Borders and bleeds can be a challenge to communicate, but critically important for your project. We want to make sure we produce exactly what you need, every time. When ordering Custom Printing on paper, please indicate both the image size and the trim size of your art. If your image bleeds off the edge of the sheet, the image and trim sizes should be the same. When in doubt, we will call you back to clarify--part of our standard quality check process. Please call for paper samples.

Standard Wrap versus Gallery Wrap

If you would like the sides of the stretched canvas to be printed, choose gallery wrap. If you would like the sides of a stretched canvas to be white, choose standard wrap. Gallery wrap is most appropriate for a frameless presentation and standard wrap for a framed presentation. Please call for canvas samples.
